

Building Digital Skills in your business

August 2022

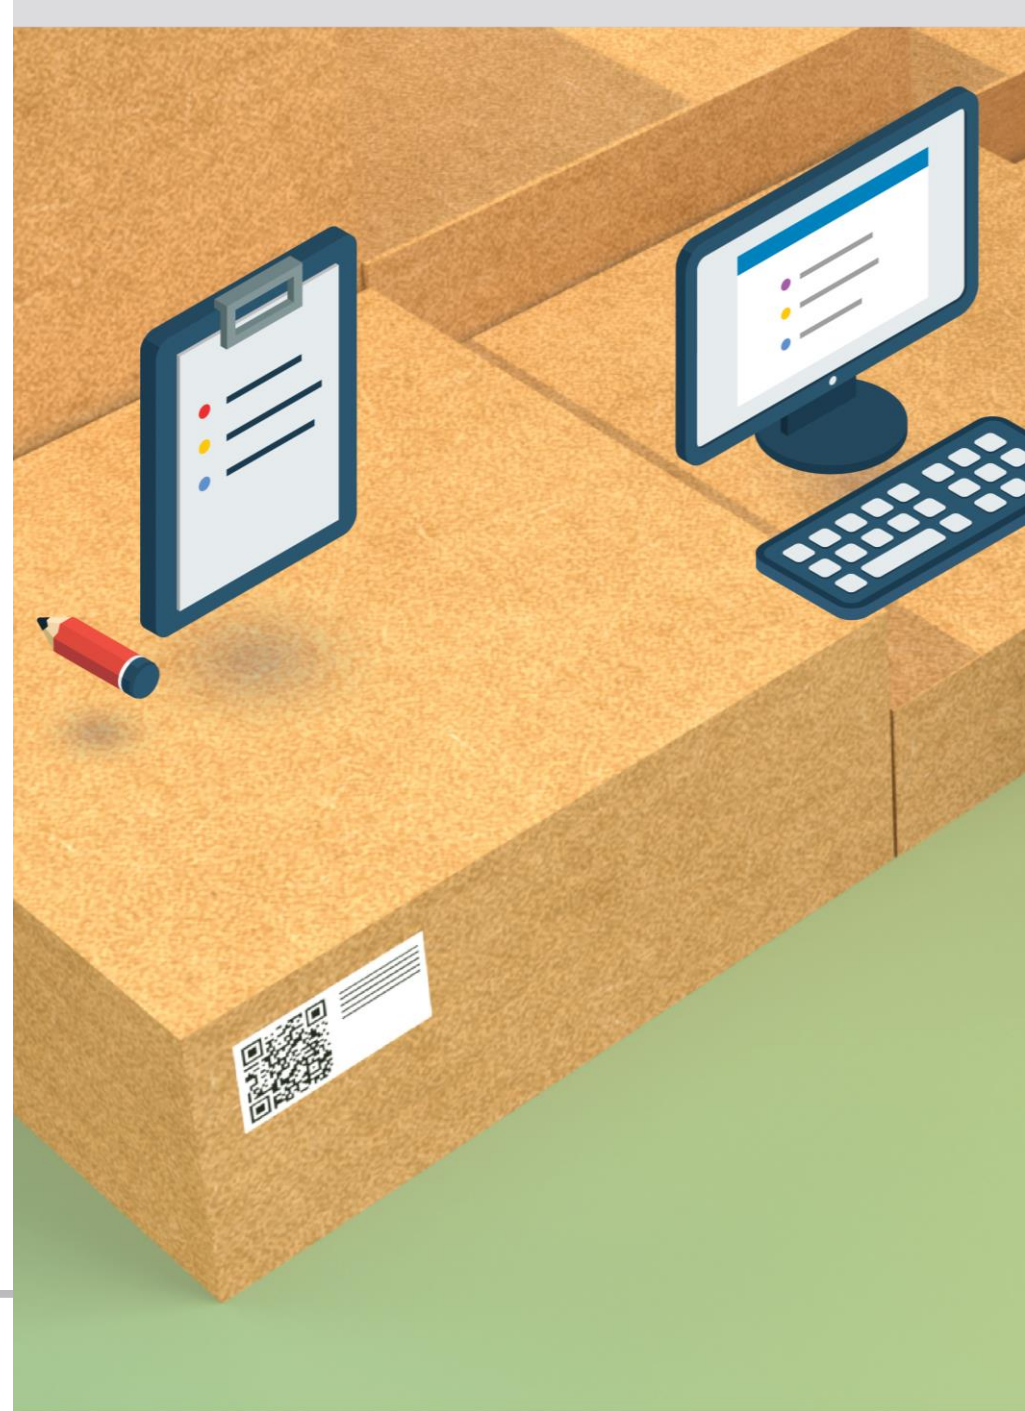

Agenda

1. What's the problem and challenges we have in NZ?
2. What are the symptoms we see and hear
3. What are the benefits we see and hear when developing people in Digital Capability and Confidence
4. Our solutions to the problem so far
5. How can you help your people

What's the problem we're solving?

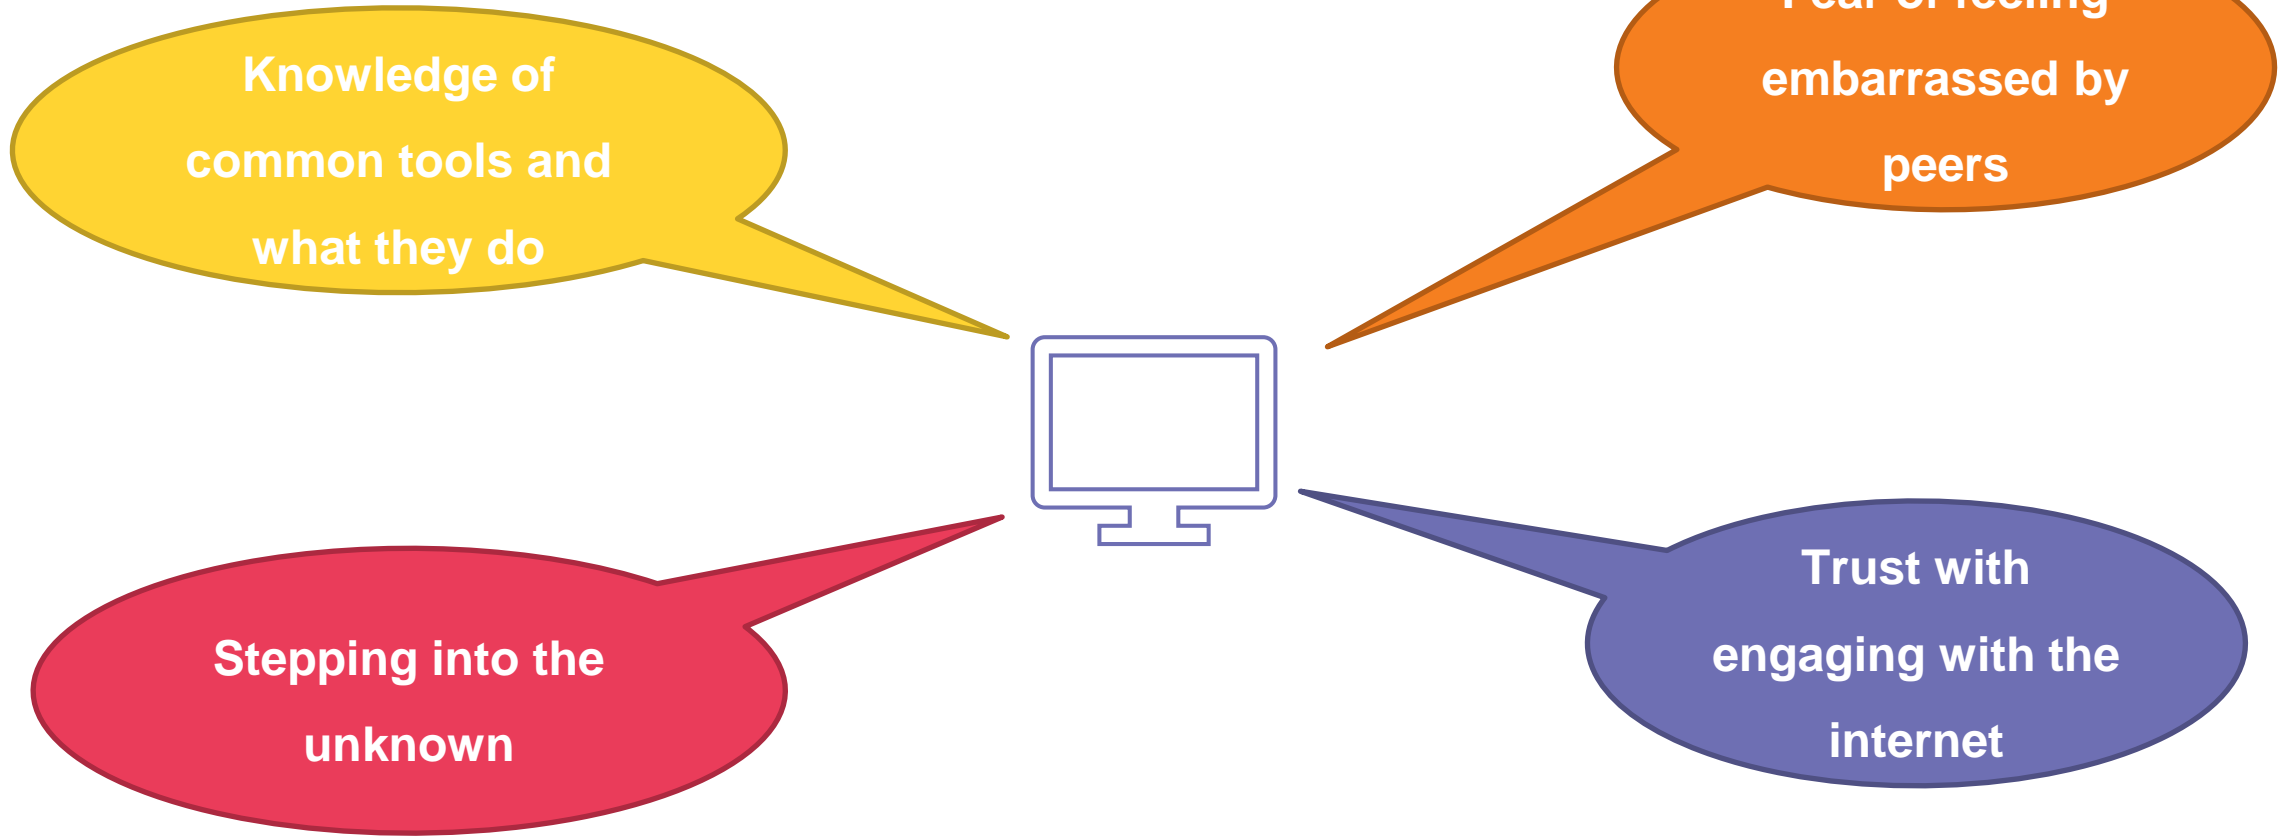

Problem / Challenges

- Speed of change in technology – Industry 4.0
- Ageing workforce
- Workplace literacy challenges in NZ – 1 in 4 adult New Zealanders struggle with some form of literacy need in their everyday life
- Digital confidence
- Digital capability

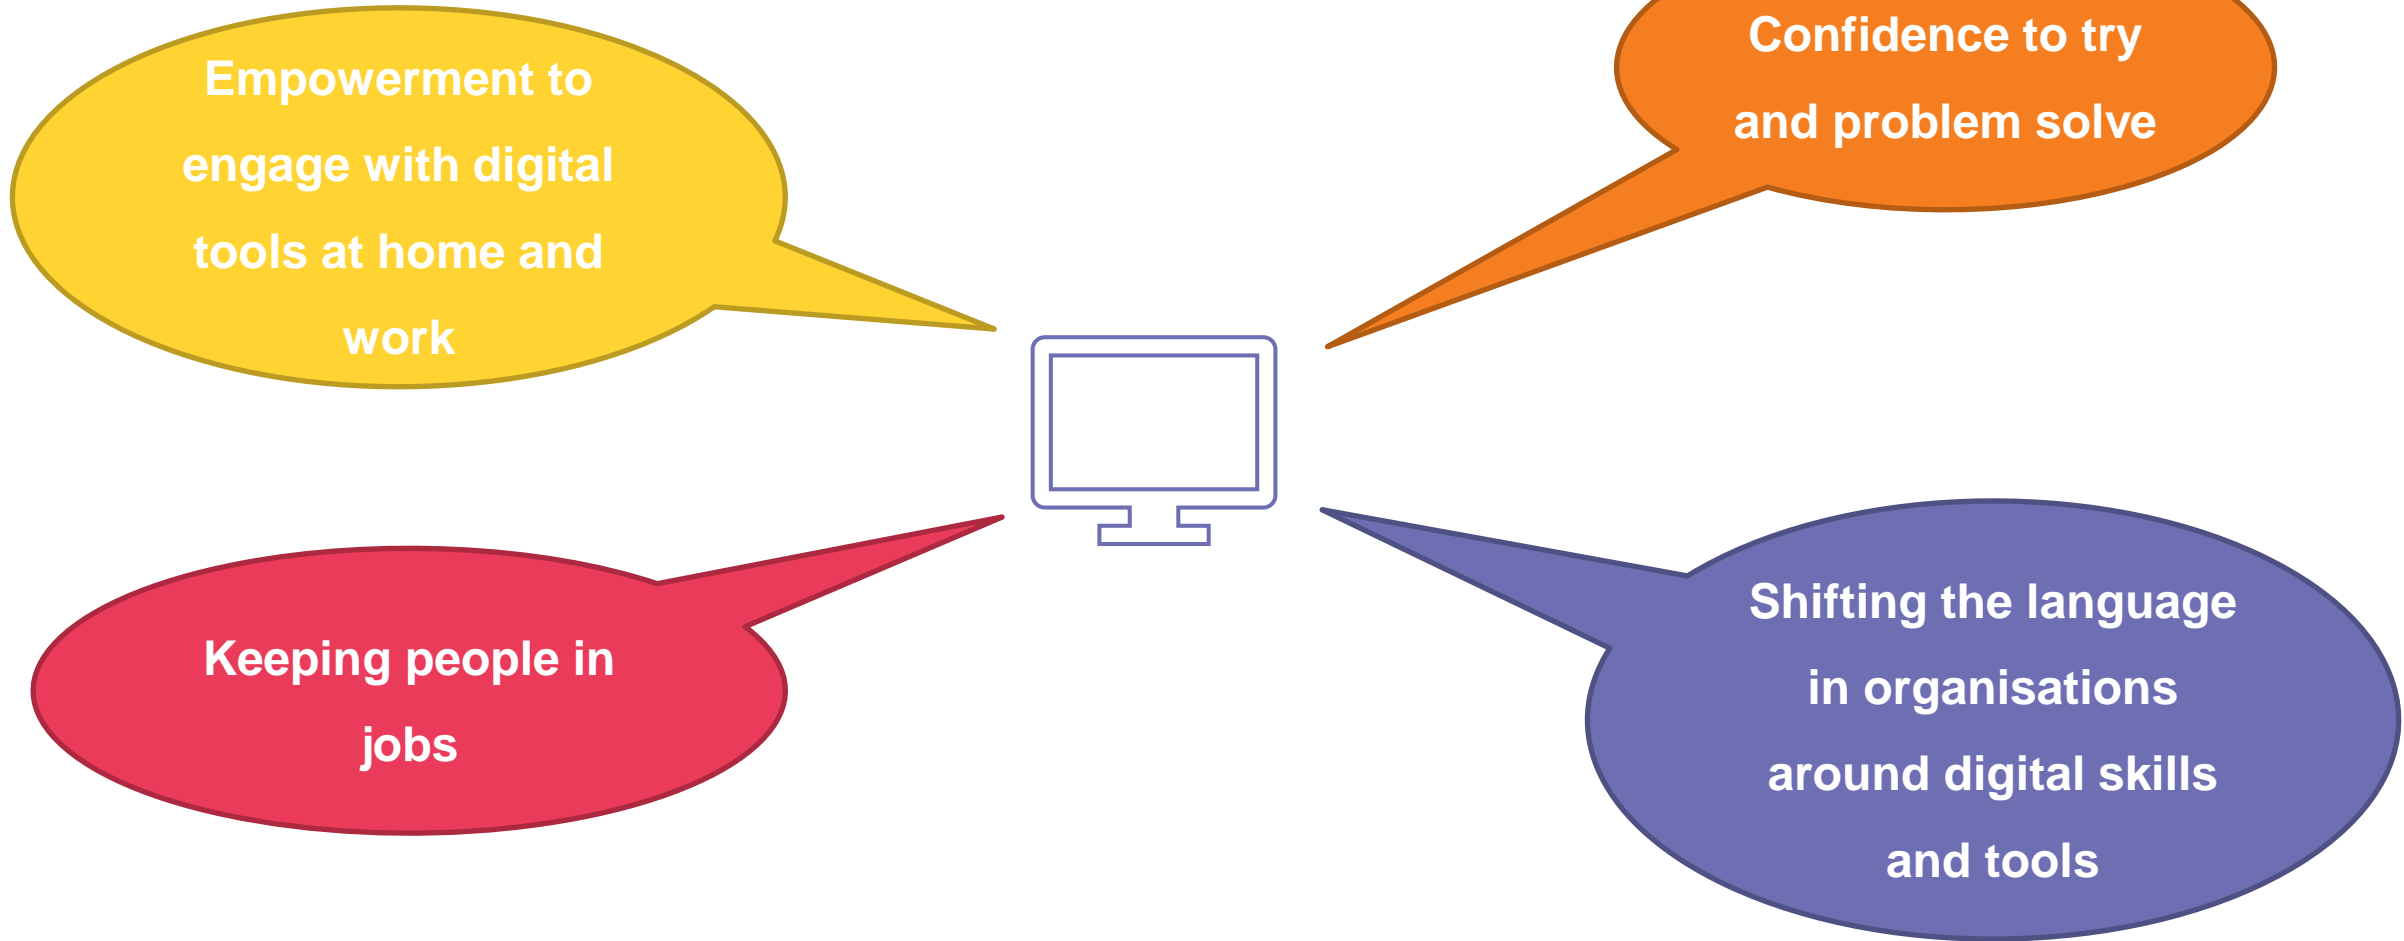

***What are the symptoms we
are seeing and hearing***

Symptoms

***What are the benefits we see
and hear from enabling
learners***

Benefits

Solutions so far

Solutions to the gap

1. Address any Workplace Literacy challenges you have with your people
2. Assess your workforce against a digital capability and confidence assessment to identify where your people are at and what support they can access
3. Support your people through a learning journey of either:
 1. Digital Skills Shift – Developed in 2020 and currently being facilitated all over NZ within manufacturing with Micro Credential
 2. Advanced Manufacturing – Currently in final stages of development with pilot across October and November 2022 and available from beginning of 2023
4. Contact info@thelearningwave.com for more info

The Digital Capability Framework

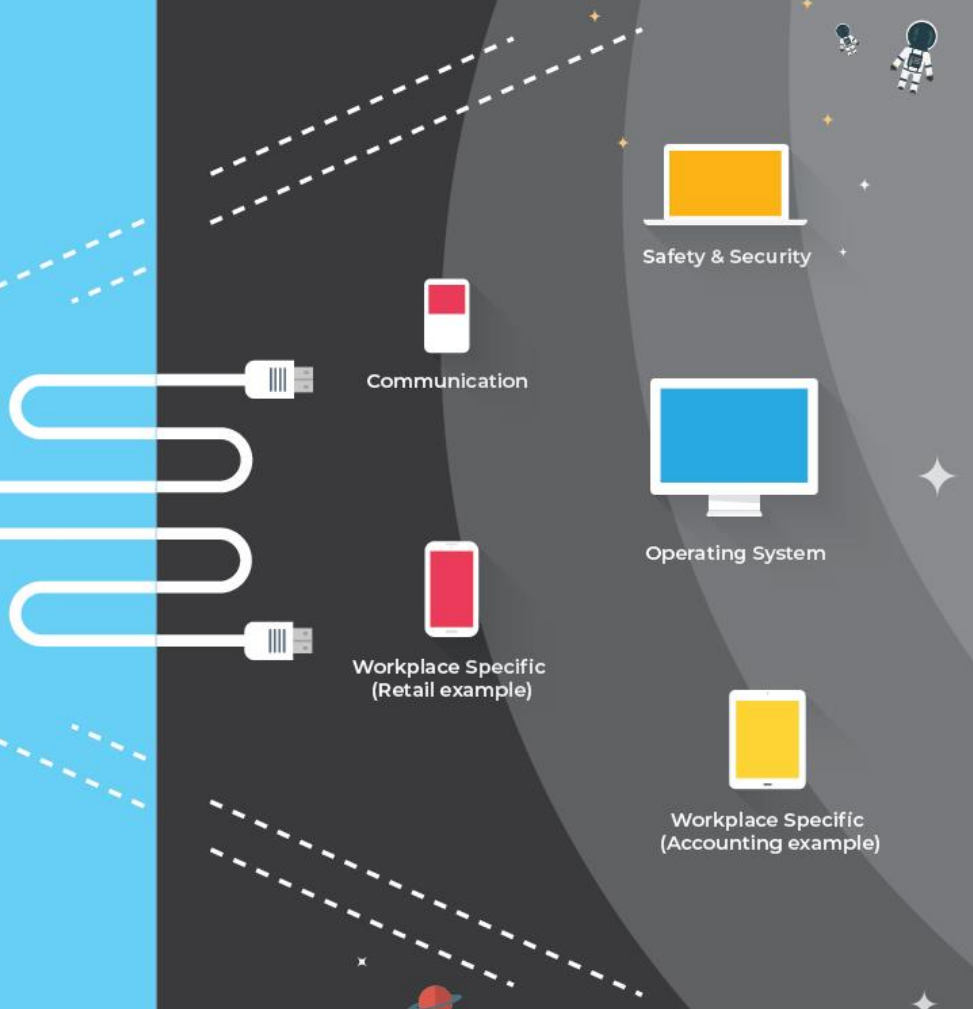

"I can learn or do this."
"I need to learn this."
"This is important."
